Purpose of the PORB

As part of CGIAR's adaptive management approach, the 2025 planning process was conducted in two phases: i) Planning Phase – This included the development of the Preliminary Work Plans and Budget, through which Program and Accelerator teams defined how their projects would be managed, including objectives, timelines, responsibilities, and required resources. ii) Re-planning Phase – This allowed for updates to the initial plans, incorporating adjustments to reflect the updates made during the re-planning window from 24 March to 23rd June 2025, ensuring alignment with the approved 2025 budget envelopes, Centre allocations, and revised priorities.

This document presents the 2025 Plan of Results and Budget (PORB) for the Genebanks Accelerator. It provides aggregated costing information for planned High-Level Outputs (HLOs) by Area of Work (AoW), along with Cross-Cutting and Management components. It also outlines the implementation timelines for both HLOs and Outcomes, as articulated in the updated Theory of Change (ToC). Additionally, the PORB highlights the intervention geographies, key partners, and mapped Centres W3/Bilateral projects.

Contents

Summary

Total Accelerator	Implementation timelines (2025)				Centers + SO Allocation	W3/Bilateral project mapping to P/As
					2025 (Approved Budget)	W3/Bilateral budget
Area of Work 0: Crosscutting and Management	X	X	X	X	1,520,244	9,992,315
Area of Work 1: Biodiversity Conservation	X	X	X	X	19,999,756	
Area of Work 2: Strategic User Engagement	X	X	X	X	530,000	
Area of Work 3: Genetic Resources Policy	X	X	X	X	1,000,000	
Area of Work 4: Germplasm Health	X	X	X	X	2,160,000	
Area of Work 5: Strengthening Capacity for In Situ and Ex Situ Conservation Globally	X	X	X	X	1,260,000	
Total Accelerator budget					**26,470,000**	**9,992,315**

Area of Work 0: Crosscutting and Management	2025				
	Q1	Q2	Q3	Q4	2025 (Approved Budget)
Genebanks Director (Estimated at 100% FTE, Jul-Dec)			X	X	1,520,244
Interim Program Director to complete the 50% time (Jan-Jun)	X	X			
Interim Deputy Director to complete the 30% time (Jan-Jun)	X	X			
AoW Transition Lead, AoW1 estimated 15% time, Jan-Dec	X	X	X	X	
AoW Transition Co-Lead, AoW1 estimated at 15% time, Jan-Dec	X	X	X	X	
AoW Transition Lead, AoW2 estimated at 15% time, Jan-Dec	X	X	X	X	
AoW Transition Co-Lead, AoW2 estimated at 15% time, Jan-Dec	X	X	X	X	
AoW Transition Lead, AoW4 estimated at 15% time, Jan-Dec	X	X	X	X	
AoW Transition Co-Lead, AoW4 estimated at 15% time, Jan-Dec	X	X	X	X	
AoW Transition Lead, AoW5 estimated at 15% time, Jan-Dec	X	X	X	X	
AoW Transition Co-Lead, AoW5 estimated at 15% time, Jan-Dec	X	X	X	X	
Interim Program Manager at 100% FTE, Jan-Dec	X	X	X	X	
Interim Finance Focal Point at 20% FTE, Apr-Dec	X	X	X	X	
Interim MELIA Focal Point at 100% FTE, Jan-Dec	X	X	X	X	
Travels and meetings (ex. AGM, science week, inception meeting)	X	X	X	X	

Area of Work 0: Crosscutting and Management	2025				
	Q1	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Communications and fund raising	X	X	X	X	
Consultant/ audits(Different support to QMS, user engagement, others)			X	X	
MELIA studies			X	X	
Miscellaneous			X	X	
Total Cross-cutting and Management budget					**1,520,244**

Area of Work 1: Biodiversity Conservation	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intemediate Outcome: Crop Trust signs Long-Term Partnerships with CGIAR	X	X	X	X	-
Intermediate Outcome: CGIAR genebanks conserve and make available crop diversity in perpetuity with greater efficiency and effectiveness	X	X	X	X	
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use	X	X	X	X	
High-Level Outputs					
1.1. All collections conserved according to international standards and best practices	X	X	X	X	**19,999,756**
1.2. Innovations to enhance the efficiency of conserving collections	X	X	X	X	
1.4. Effective and AI-ready data management systems using harmonized data standards across Centers	X	X	X	X	
Total AoW 1 budget					**19,999,756**

Area of Work 2: Strategic User Engagement	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities				X	-
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use				X	

Area of Work 2: Strategic User Engagement	2025				
High-Level Outputs					
2.1. A strategy for proactive engagement with diverse users	X	X	X	X	**530,000**
2.2. Enhanced germplasm information for more precise accession targeting	X	X	X	X	
2.4. Genebank product development to enhance diversity use	X	X	X	X	
Total AoW 2 budget					**530,000**

Area of Work 3: Genetic Resources Policy	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intermediate Outcome: International and national organizations adopt and implement supportive access and benefit sharing policies	X	X	X	X	-
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use				X	
High-Level Outputs					
3.1. CGIAR Genebanks contributions to international negotiations	X	X	X	X	**1,000,000**
3.2. New CGIAR policies developed to operate under new access and benefit sharing rules.	X	X	X	X	
3.3. Draft national laws, policies and guidelines developed for partner countries to implement and operate under the Plant Treaty.	X	X	X	X	
Total AoW 3 budget					**1,000,000**

Area of Work 4: Germplasm Health	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intermediate Outcome: CGIAR and internal and external partners exchange genetic resources without the risk of spreading quarantine pests or diseases	X	X	X	X	-
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use	X	X	X	X	

Area of Work 4: Germplasm Health	2025				
High-Level Outputs					
4.1. Optimized phytosanitary health delivery system	X	X	X	X	**2,160,000**
4.2. Improved diagnostics and novel therapies for efficient germplasm health testing and phytosanitation	X	X	X	X	
4.3. Enhanced knowledge for effective control of germplasm-borne pests and diseases	X	X	X	X	
4.4. Systems-based phytosanitary protocol for expedited germplasm delivery	X	X	X	X	
Total AoW 4 budget					**2,160,000**

Area of Work 5: Strengthening Capacity for In Situ and Ex Situ Conservation Globally	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intermediate Outcome: National partners apply skills to the management and exchange of agrobiodiversity	X	X	X	X	**-**
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use	X	X	X	X	
High-Level Outputs					
5.1. Regional hubs for increasing capacities and saving crop diversity at risk	X	X	X	X	**1,260,000**
5.2. Communities of Practices and networks for diversity/gap analyses of crops at a regional level for strategic conservation and use	X	X	X	X	
5.3. Capacity strengthened at a national and regional level for collection, conservation, SQM and characterization, phytosanitary measures for germplasm exchange and policy	X	X	X	X	
5.4. Unique crop diversity under threat is safeguarded through the integration of in situ and ex situ conservation strategies	X	X	X	X	
Total AoW 5 budget					**1,260,000**

Cross-Accelerator collaboration

Accelerator	Primary/ Secondary collaboration	Area of Work Title and Number	High level output	Brief description of how each Accelerator contributes
Breeding for Tomorrow	Primary	Strategic User Engagement (AOW02)	High Level Output 2.1 A strategy for proactive engagement with diverse users	Shares market intelligence
Breeding for Tomorrow	Primary	Strategic User Engagement (AOW02)	High Level Output 2.2 Enhanced germplasm information for more precise accession targeting	Data Generation
Digital Transformation	Primary	Strategic User Engagement (AOW02)	High Level Output 2.2 Enhanced germplasm information for more precise accession targeting	Ensures adherence to FAIR principles
Breeding for Tomorrow	Primary	Strategic User Engagement (AOW02)	High Level Output 2.3 CGIAR-wide portal with AI enabled digital infrastructure for germplasm data and requests	Supports the development of the AI supported Querying and Distribution Portal
Digital Transformation	Primary	Strategic User Engagement (AOW02)	High Level Output 2.3 CGIAR-wide portal with AI enabled digital infrastructure for germplasm data and requests	Shares market intelligence and products
Breeding for Tomorrow	Primary	Strategic User Engagement (AOW02)	High Level Output 2.4 Genebank products developed to enhance diversity use	Shares market intelligence
Breeding for Tomorrow	Primary	Genetic Resources Policy (AOW03)	High Level Output 3.1 CGIAR Genebanks contributions to international organizations	Cooperate in policy research

Accelerator	Primary/ Secondary collaboration	Area of Work Title and Number	High level output	Brief description of how each Accelerator contributes
Breeding for Tomorrow	Primary	Genetic Resources Policy (AOW03)	High Level Output 3.2 New CGIAR policies developed to operate under new access and benefit sharing rules	Develop CGIAR licensing policy; contribute to actionable policy research re impact of ABS measures on conservation and use of genetic resources, redistribution of commercial benefits, technology transfer, information sharing and capacity sharing; feedback on compliance and capacity needs;s; user of guidelines, policies, training courses, help desk.
Breeding for Tomorrow	Primary	Genetic Resources Policy (AOW03)	High Level Output 3.3. Draft national laws, policies and guidelines developed for partner countries to implement and operate under the Plant Treaty	Organizing joint activities, generate synergies and improve efficiency (e.g. collaborative capacity needs assessmen; joint capacity development workshops). Contribute to joint efforts to integrate and scale-up CGIAR capacity sharing in the context of the Plant Treaty's capacity strengthening strategy and action plan.
Multifunctional Landscapes	Primary	Genetic Resources Policy (AOW03)	High Level Output 3.3. Draft national laws, policies and guidelines developed for partner countries to implement and operate under the Plant Treaty	"Organizing joint activities, generate synergies and improve efficiency (e.g. collaborative capacity needs assessmen; joint capacity development workshops). Contribute to joint efforts to integrate and scale-up CGIAR capacity sharing in the context of the Plant Treaty's capacity strengthening strategy and action plan. Ensuring implementation of policies related to Farmer's Rights, traditional knowledge and Access and Benefit Sharing. "
Capacity Sharing	Primary	Genetic Resources Policy (AOW03)	High Level Output 3.3. Draft national laws, policies and guidelines developed for partner countries to implement and operate under the Plant Treaty	Contribute resource persons, and capacity development tools and resources.
Breeding for Tomorrow	Primary	Germplasm Health (AOW04)	High Level Output 4.1. Optimized phytosanitary health delivery system	Co-creation, knowledge sharing, and leverage 3rd party research outputs for strengthening SOPs/QMS and improve operational efficiency
Sustainable Farming	Primary	Germplasm Health (AOW04)	High Level Output 4.1. Optimized phytosanitary health delivery system	Co-creation, knowledge sharing, and leverage 3rd party research outputs for strengthening SOPs/QMS and improve operational efficiency

Accelerator	Primary/ Secondary collaboration	Area of Work Title and Number	High level output	Brief description of how each Accelerator contributes
Sustainable Farming	Primary	Germplasm Health (AOW04)	High Level Output 4.2. Improved diagnostics and novel therapies for efficient germplasm health testing and phytosanitation	Complementary research, knowledge sharing, and leverage 3rd party research outputs for development and validation of protocols
Sustainable Farming	Primary	Germplasm Health (AOW04)	High Level Output 4.3. Enhanced knowledge for effective control of germplasm-borne pests and diseases	Complementary research, knowledge sharing, and leverage 3rd party research outputs for development and validation of protocols
Breeding for Tomorrow	Primary	Germplasm Health (AOW04)	High Level Output 4.3. Enhanced knowledge for effective control of germplasm-borne pests and diseases	Complementary research, knowledge sharing, and leverage 3rd party research outputs for development and validation of protocols
Sustainable Farming	Primary	Germplasm Health (AOW04)	High Level Output 4.4. Systems-based phytosanitary protocol for expedited germplasm delivery	Advocacy and awareness raising, knowledge sharing, and stakeholder consultation workshops
Breeding for Tomorrow	Primary	Germplasm Health (AOW04)	High Level Output 4.4. Systems-based phytosanitary protocol for expedited germplasm delivery	Advocacy and awareness raising, knowledge sharing, and stakeholder consultation workshops
Breeding for Tomorrow	Primary	Strengthening Capacity for In Situ and Ex Situ Conservation Globally (AOW05)	High Level 5.3. Capacity strengthened at a regional level for collection, conservation, SQM and characterization, phytosanitary measures for germplasm exchange and policy	Collaborate to execute the capacity strengthening of NARS
Capacity Sharing	Primary	Strengthening Capacity for In Situ and Ex Situ Conservation Globally (AOW05)	High Level Output 5.3. Capacity strengthened at a regional level for collection, conservation, SQM and characterization, phytosanitary measures for germplasm exchange and policy	Support the development and delivery of targeted capacity-strengthening initiatives for national and regional partners.

Accelerator	Primary/ Secondary collaboration	Area of Work Title and Number	High level output	Brief description of how each Accelerator contributes
Multifunctional Landscapes	Primary	Strengthening Capacity for In Situ and Ex Situ Conservation Globally (AOW05)	High Level Output 5.4. Unique crop diversity under threat is safeguarded through the integration of in situ and ex situ conservation strategies	In Peru and Colombia, and subject to funding also in Africa, AoW 5 will collaborate with the Multifunctional Landscapes initiative. This partnership aims to develop and scale technological and institutional innovations that enhance food production and improve human diets, while simultaneously supporting ecosystem restoration, biodiversity conservation, and climate change adaptation and mitigation.
Food Frontiers and Security	Primary	Strengthening Capacity for In Situ and Ex Situ Conservation Globally (AOW05)	High Level Output 5.4. Unique crop diversity under threat is safeguarded through the integration of in situ and ex situ conservation strategies	AoW5 will also contribute to the deliverables of Food Frontiers and Security (AoW 4 Island Food Systems) on documenting, managing and using genetic diversity, connecting in situ with ex situ.

Contracted partners (CRAs, sub-grant agreement, LoI, MoU)

Contracted partner	Center	Area of Work Title and Number	High level output (If Available)
Global Crop Diversity Trust	AfricaRice, Alliance-Bioversity, Alliance-CIAT, CIMMYT, CIP, ICARDA, ICRISAT, IITA, ILRI, IRRI	Biodiversity Conservation (AOW01)	High Level Output 1.1 All collections conserved according to international standards and best practices
Aarhus University	Alliance-CIAT	Biodiversity Conservation (AOW01)	High Level Output 1.2 Innovations to enhance the efficiency of conserving collections
Google	AfricaRice, Alliance-Bioversity, Alliance-CIAT, CIMMYT, CIP, ICARDA, ICRISAT, IITA, ILRI, IRRI	Strategic User Engagement (AOW02)	High Level Output 2.4 Genebank products developed to enhance diversity use
OneWorld Analytics	AfricaRice, Alliance-Bioversity, Alliance-CIAT, CIMMYT, CIP, ICARDA, ICRISAT, IITA, ILRI, IRRI	Genetic Resources Policy (AOW03)	High Level Output 3.1 CGIAR Genebanks contributions to international organizations
DSI Scientific Network	AfricaRice, Alliance-Bioversity, Alliance-CIAT, CIMMYT, CIP, ICARDA, ICRISAT, IITA, ILRI, IRRI	Genetic Resources Policy (AOW03)	High Level Output 3.1 CGIAR Genebanks contributions to international organizations
Open University, UK	AfricaRice, Alliance-Bioversity, Alliance-CIAT, CIMMYT, CIP, ICARDA, ICRISAT, IITA, ILRI, IRRI	Genetic Resources Policy (AOW03)	High Level Output 3.2 New CGIAR policies developed to operate under new access and benefit sharing rules
Open University, UK	AfricaRice, Alliance-Bioversity, Alliance-CIAT, CIMMYT, CIP, ICARDA, ICRISAT, IITA, ILRI, IRRI	Strengthening Capacity for In Situ and Ex Situ Conservation Globally (AOW05)	High Level Output 5.3 Capacity strengthened at a regional level for collection, conservation, SQM and characterization, phytosanitary measures for germplasm exchange and policy

Targeted geographies

Country, region, or global	Area of Work Title and Number	High level output

Area of Work 0: Crosscutting and Management	X	X	X	X	**40,000**
Area of Work 1: Biodiversity Conservation	X	X	X	X	**426,000**
Area of Work 2: Strategic User Engagement	X	X	X	X	**29,100**
Area of Work 4: Germplasm Health	X	X	X	X	**180,000**
Area of Work 5: Strengthening Capacity for In Situ and Ex Situ Conservation Globally	X	X	X	X	**184,000**
Total Accelerator budget					**859,100**

Area of Work 0: Crosscutting and Management	**2025**				
	Q1	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
AoW Transition Lead, AoW5 estimated at 15% time, Jan-Dec	X	X	X	X	**40,000**
Total Cross-cutting and Management budget					**40,000**

Area of Work 1: Biodiversity Conservation	**2025**				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intemediate Outcome: Crop Trust signs Long-Term Partnerships with CGIAR	X	X	X	X	**-**
Intermediate Outcome: CGIAR genebanks conserve and make available crop diversity in perpetuity with greater efficiency and effectiveness	X	X	X	X	
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use	X	X	X	X	

Area of Work 1: Biodiversity Conservation	2025				
High-Level Outputs					
1.1. All collections conserved according to international standards and best practices	X	X	X	X	**426,000**
1.2. Innovations to enhance the efficiency of conserving collections	X	X	X	X	
1.4. Effective and AI-ready data management systems using harmonized data standards across Centers	X	X	X	X	
Total AoW 1 budget					**426,000**

Area of Work 2: Strategic User Engagement	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities				X	**-**
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use				X	
High-Level Outputs					
2.3. CGIAR-wide portal with AI enabled digital infrastructure for germplasm data and requests	X	X	X	X	**29,100**
Total AoW 2 budget					**29,100**

Area of Work 4: Germplasm Health	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intermediate Outcome: CGIAR and internal and external partners exchange genetic resources without the risk of spreading quarantine pests or diseases	X	X	X	X	**-**
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use	X	X	X	X	
High-Level Outputs					
4.1. Optimized phytosanitary health delivery system	X	X	X	X	**180,000**
4.2. Improved diagnostics and novel therapies for efficient germplasm health testing and phytosanitation	X	X	X	X	
4.3. Enhanced knowledge for effective control of germplasm-borne pests and diseases	X	X	X	X	
4.4. Systems-based phytosanitary protocol for expedited germplasm delivery	X	X	X	X	
Total AoW 4 budget					**180,000**

Area of Work 5: Strengthening Capacity for In Situ and Ex Situ Conservation Globally	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intermediate Outcome: National partners apply skills to the management and exchange of agrobiodiversity	X	X	X	X	-
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use	X	X	X	X	
High-Level Outputs					
5.1. Regional hubs for increasing capacities and saving crop diversity at risk					184,000
5.2. Communities of Practices and networks for diversity/gap analyses of crops at a regional level for strategic conservation and use	X	X	X	X	
5.3. Capacity strengthened at a national and regional level for collection, conservation, SQM and characterization, phytosanitary measures for germplasm exchange and policy	X	X	X	X	
Total AoW 5 budget					**184,000**

Genebanks: Bioversity International

	Implementation timelines (2025)				Pooled funding Budget
Total Accelerator	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Area of Work 0: Crosscutting and Management	X	X	X	X	**624,044**
Area of Work 1: Biodiversity Conservation	X	X	X	X	**1,717,718**
Area of Work 2: Strategic User Engagement	X	X	X	X	**99,100**
Area of Work 3: Genetic Resources Policy	X	X	X	X	**1,000,000**
Area of Work 4: Germplasm Health	X	X	X	X	**155,000**
Area of Work 5: Strengthening Capacity for In Situ and Ex Situ Conservation Globally	X	X	X	X	**292,000**
Total Accelerator budget					**3,887,862**

Area of Work 0: Crosscutting and Management		2025			
	Q1	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Interim Program Manager at 100% FTE, Jan-Dec	X	X	X	X	**624,044**
Travels and meetings (ex. AGM, science week, inception meeting)	X	X	X	X	
Communications and fund raising	X	X	X	X	
Consultant/ audits(Different support to QMS, user engagement, others)	X	X	X	X	
MELIA studies			X	X	
Total Cross-cutting and Management budget					**624,044**

Area of Work 1: Biodiversity Conservation		2025			
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intemediate Outcome: Crop Trust signs Long-Term Partnerships with CGIAR	X	X	X	X	**-**
Intermediate Outcome: CGIAR genebanks conserve and make available crop diversity in perpetuity with greater efficiency and effectiveness	X	X	X	X	
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use	X	X	X	X	

Area of Work 1: Biodiversity Conservation	2025				
High-Level Outputs					
1.1. All collections conserved according to international standards and best practices	X	X	X	X	1,717,718
1.2. Innovations to enhance the efficiency of conserving collections	X	X	X	X	
1.3. Optimized collection composition and structure to represent crop gene pools	X	X	X	X	
1.4. Effective and AI-ready data management systems using harmonized data standards across Centers	X	X	X	X	
Total AoW 1 budget					**1,717,718**

Area of Work 2: Strategic User Engagement	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities				X	-
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use				X	
High-Level Outputs					
2.2. Enhanced germplasm information for more precise accession targeting	X	X	X	X	99,100
Total AoW 2 budget					**99,100**

Area of Work 3: Genetic Resources Policy	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intermediate Outcome: International and national organizations adopt and implement supportive access and benefit sharing policies	X	X	X	X	-
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use				X	
High-Level Outputs					
3.1. CGIAR Genebanks contributions to international negotiations	X	X	X	X	1,000,000
3.2. New CGIAR policies developed to operate under new access and benefit sharing rules.	X	X	X	X	
Total AoW 3 budget					**1,000,000**

Area of Work 4: Germplasm Health	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intermediate Outcome: CGIAR and internal and external partners exchange genetic resources without the risk of spreading quarantine pests or diseases	X	X	X	X	
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	**-**
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use	X	X	X	X	
High-Level Outputs					
4.1. Optimized phytosanitary health delivery system	X	X	X	X	
4.2. Improved diagnostics and novel therapies for efficient germplasm health testing and phytosanitation	X	X	X	X	
4.3. Enhanced knowledge for effective control of germplasm-borne pests and diseases	X	X	X	X	**155,000**
4.4. Systems-based phytosanitary protocol for expedited germplasm delivery	X	X	X	X	
Total AoW 4 budget					**155,000**

Area of Work 5: Strengthening Capacity for In Situ and Ex Situ Conservation Globally	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intermediate Outcome: National partners apply skills to the management and exchange of agrobiodiversity	X	X	X	X	**-**
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	**-**
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use	X	X	X	X	**-**
High-Level Outputs					
5.1. Regional hubs for increasing capacities and saving crop diversity at risk					**292,000**
5.2. Communities of Practices and networks for diversity/gap analyses of crops at a regional level for strategic conservation and use	X	X	X	X	
5.3. Capacity strengthened at a national and regional level for collection, conservation, SQM and characterization, phytosanitary measures for germplasm exchange and policy	X	X	X	X	
Total AoW 5 budget					**292,000**

	Q1	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Interim MELIA Focal Point at 100% FTE, Jan-Dec	X	X	X	X	**81,200**
MELIA studies			X	X	
Total Cross-cutting and Management budget					**81,200**

Area of Work 1: Biodiversity Conservation	**2025**				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intemediate Outcome: Crop Trust signs Long-Term Partnerships with CGIAR	X	X	X	X	**-**
Intermediate Outcome: CGIAR genebanks conserve and make available crop diversity in perpetuity with greater efficiency and effectiveness	X	X	X	X	
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use	X	X	X	X	

Area of Work 1: Biodiversity Conservation	2025				
High-Level Outputs					
1.1. All collections conserved according to international standards and best practices	X	X	X	X	**2,473,014**
1.2. Innovations to enhance the efficiency of conserving collections	X	X	X	X	
1.3. Optimized collection composition and structure to represent crop gene pools	X	X	X	X	
1.4. Effective and AI-ready data management systems using harmonized data standards across Centers	X	X	X	X	
Total AoW 1 budget					**2,473,014**

Area of Work 2: Strategic User Engagement	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities				X	**-**
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use				X	
High-Level Outputs					
2.2. Enhanced germplasm information for more precise accession targeting	X	X	X	X	**43,650**
2.3. CGIAR-wide portal with AI enabled digital infrastructure for germplasm data and requests	X	X	X	X	
Total AoW 2 budget					**43,650**

Area of Work 4: Germplasm Health	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intermediate Outcome: CGIAR and internal and external partners exchange genetic resources without the risk of spreading quarantine pests or diseases	X	X	X	X	**-**
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use	X	X	X	X	

Area of Work 4: Germplasm Health	2025				
High-Level Outputs					
4.1. Optimized phytosanitary health delivery system	X	X	X	X	**200,000**
4.2. Improved diagnostics and novel therapies for efficient germplasm health testing and phytosanitation	X	X	X	X	
4.3. Enhanced knowledge for effective control of germplasm-borne pests and diseases	X	X	X	X	
4.4. Systems-based phytosanitary protocol for expedited germplasm delivery			X	X	
Total AoW 4 budget					**200,000**

Area of Work 5: Strengthening Capacity for In Situ and Ex Situ Conservation Globally	2025				
Outcome	**Q1**	**Q2**	**Q3**	**Q4**	**2025 (Approved Budget)**
Intermediate Outcome: National partners apply skills to the management and exchange of agrobiodiversity	X	X	X	X	**-**
2030 Outcome 1: National and International genebanks conserve and make diversity more widely available in a strengthened global system of enabling policies and increased capacities	X	X	X	X	
2030 Outcome 2: Researchers, farmers, and students access diversity and associated data in a smarter and more targeted way for increased use	X	X	X	X	
High-Level Outputs					
5.2. Communities of Practices and networks for diversity/gap analyses of crops at a regional level for strategic conservation and use	X	X	X	X	**52,000**
5.3. Capacity strengthened at a national and regional level for collection, conservation, SQM and characterization, phytosanitary measures for germplasm exchange and policy	X	X	X	X	
Total AoW 5 budget					**52,000**

Genebanks: International Crops Research Institute for the Semi-Arid Tropics
