BREEDING FOR
TOMORROW

Plan of results and budget 2025

CGIAR Science Program on
Breeding for Tomorrow

Farmers planting beans. Climbing
beans in Rwanda perform more than
three times better than other varieties
Credit: ©2015 CIAT/Georgina Smith

Purpose of the PORB

As part of CGIAR's adaptive management approach, the 2025 planning process was conducted in two phases: i) Planning Phase – This included the development of the Preliminary Work Plans and Budget, through which Program and Accelerator teams defined how their projects would be managed, including objectives, timelines, responsibilities, and required resources. ii) Re-planning Phase – This allowed for updates to the initial plans, incorporating adjustments to reflect the updates made during the re-planning window from 24 March to 23rd June 2025, ensuring alignment with the approved 2025 budget envelopes, Centre allocations, and revised priorities.

This document presents the 2025 Plan of Results and Budget (PORB) for the Breeding for Tomorrow Program. It provides aggregated costing information for planned High-Level Outputs (HLOs) by Area of Work (AoW), along with Cross-Cutting and Management components. It also outlines the implementation timelines for both HLOs and Outcomes, as articulated in the updated Theory of Change (ToC). Additionally, the PORB highlights the intervention geographies, key partners, and mapped Centres W3/Bilateral projects.

Summary	4
W3 Mapping	8
W3/Bilateral project mapping to Breeding for Tomorrow	9
Cross-Program collaboration	18
Contracted partners (CRAs, sub-grant agreement, LoI, MoU)	22
System Organization and center allocations	58
System Organization: Breeding for Tomorrow	59
Breeding for Tomorrow: AfricaRice	60
Breeding for Tomorrow: International Center for Tropical Agriculture	63
Breeding for Tomorrow: International Maize and Wheat Improvement Center	66
Breeding for Tomorrow: International Potato Center	69
Breeding for Tomorrow: International Center for Agricultural Research in the Dry Areas	72
Breeding for Tomorrow: International Crops Research Institute for the Semi-Arid Tropics	74
Breeding for Tomorrow: International Food Policy Research Institute	76
Breeding for Tomorrow: International Institute of Tropical Agriculture	78
Breeding for Tomorrow: International Livestock Research Institute	82
Breeding for Tomorrow: International Rice Research Institute	83

Summary

Total Program						Implementation timelines (2025)	Centers + SO Allocation	W3/Bilateral project mapping to P/ As			
						2025 (Approved Budget)	W3/Bilateral budget				
Area of Work 0: Crosscutting and Management						X	X	X	X	1,904,325	79,215,708
Area of Work 1: Market Intelligence						X	X	X	X	2,847,090	
Area of Work 2: Accelerated Breeding						X	X	X	X	15,843,711	
Area of Work 3: Inclusive Delivery						X	X	X	X	4,557,475	
Area of Work 4: Breeding Resources						X	X	X	X	3,156,222	
Area of Work 5: Enable						X	X	X	X	1,639,977	
Total Program budget						29,948,800					79,215,708

Area of Work 0: Crosscutting and Management	2025				2025 (Approved Budget)
	Q1	Q2	Q3	Q4	
Accelerated Breeding AoW co-lead contribution to B4T (Africa Rice colleague)	X	X			1,904,325
Enable AoW co-lead contribution to B4T (CIAT colleague)	X	X	X	X	
Monica A. Casamachin Rodriguez (Centre cost, not Program cost)	X	X	X	X	
Clare Mukankusi (Centre cost, not Program cost)	X	X	X	X	
Travel (Centre cost, not Program cost)			X	X	
B4T Interim Director CIMMYT contribution to B4T	X	X	X	X	
Breeding Resources AoW Lead contribution to B4T (CIMMYT colleague)	X	X	X	X	
Inclusive Delivery AoW Lead contribution to B4T (CIMMYT colleague)	X	X	X	X	
Enable AoW Lead contribution to B4T (CIMMYT colleague)	X	X	X	X	
Communications Lead contribution to B4T (CIMMYT colleague)	X	X	X	X	
Breeding Resources AoW Lead contribution to B4T (CIMMYT colleague)	X	X	X	X	
MELIA consultant	X	X			
Incurred travel costs in Q1 and Q2 for Science Week (for AoW Lead and Co-lead colleagues)		X			
Salary of CIP Interim Director contributions to B4T	X	X	X	X	
Accelerated Breeding AoW co-lead contribution to B4T (CIP colleague)	X	X			

Area of Work 0: Crosscutting and Management					2025
					2025 (Approved Budget)
	Q1	Q2	Q3	Q4	
MEL Review and refinement of the Program/Accelerator's results framework, theory of change, indicators, and targets through document analysis, coordination activities, and consultations with Area of Work leads (Centre cost, not Program cost)	X				2,847,090
Ensure safe movement of more than 5000 seed samples each year outgoing and incoming to/from partners and CGIAR (Centre cost, not Program cost)	X	X			
Ensure supervision of all breeding activities and institutional oversight (Centre cost, not Program cost)	X	X	X		
Manage breeding operations and reports effectively including purchases, MEL, and logistics (Centre cost, not Program cost)	X	X			
Cross-cutting (three consultancies focused on heat stress breeding and implementing fingerprinting control in breeding programmes) (Centre cost, not Program cost)		X	X	X	
Inclusive Delivery AoW co-Lead contribution to B4T (IFPRI colleague)	X	X	X	X	
Inclusive Delivery AoW co-Lead contribution to B4T (IITA colleague)	X	X			
Interim Program Deputy Director salary contributions to B4T (ILRI colleague)	X	X	X	X	
Interim Director salary contribution to B4T	X	X			
Market Intelligence AoW lead salary contribution to B4T	X	X	X	X	
Permanent Director salary			X	X	
Interim Program Manager - salary costs	X	X	X	X	
Interim Program manager incurred Sci Wk travel costs		X			
Total Cross-cutting and Management budget					1,904,325

Area of Work 1: Market Intelligence					2025
					2025 (Approved Budget)
High-Level Outputs	Q1	Q2	Q3	Q4	
HLO1.AOW1.IO1 Steer to impact: Market intelligence is packaged into decision-support tools to guide investment decisions in breeding and other science programs	X	X	X	X	2,847,090
HLO2.AOW1.IO1 Target markets: Market intelligence is gathered to evidence demand-led and foresight opportunities for impact	X	X	X	X	
HLO3.AOW1.IO1 Design concepts: New product concepts are designed for demand-led and foresight opportunities, that can be used by breeders to meet the Product Design Standard.	X	X	X	X	
HLO4.AOW1.IO1 Foster motivations: Intelligence gathered on motivations (social, economic, behavioral) for change across the supply chain, consumers and smallholder farmers	X	X	X	X	

Area of Work 1: Market Intelligence					2025
High-Level Outputs					2025 (Approved Budget)
HLO5.AOW1.IO3 Investment cases: Investment case studies are developed to inform investments for maximized impact (change in targeted SDGs)					
Total AoW 1 budget					2,847,090

Area of Work 2: Accelerated Breeding					2025				
High-Level Outputs					Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO6.AOW2.IO1 Refocus to markets: Feasible breeding pipelines are aligned to market segments and opportunities, as guided by product concepts.					X	X	X	X	15,843,711
HLO7.AOW2.IO2 Accelerating genetic gain: Design of optimized breeding schemes and pipelines that maximize the potential for genetic gain.					X	X	X	X	
HLO8.AOW2.IO2 Discover genetic potential: Discovery and development of foundational genetic resources such as traits, high-value haplotypes and elite lines that can deliver on targeted product profiles					X	X	X	X	
HLO9.AOW2.IO2 Transform collaboration: Partners are embedded in decision-making for optimized breeding schemes					X	X	X	X	
HLO10.AOW2.IO2 Create products: Breeding networks collaborate on the development of targeted products.					X	X	X	X	
Total AoW 2 budget									15,843,711

Area of Work 3: Inclusive Delivery		2025				
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)	
HLO11.AOW3.IO4 Position for demand: Strategies to position quality seed and increase scaling partner demand for new varieties, encouraging variety replacement and Product Lifecycle Management.	X	X	X	X	4,557,475	
HLO12.AOW3.IO5 Deploy seed: Technologies and strategies to encourage scaling partners to increase production and equitable supply of new varieties.	X	X	X	X		
HLO13.AOW3.IO5 Power seed scaling: Technologies, strategies and regulatory solutions to encourage scaling partners to accelerate delivery of new varieties to smallholders.	X	X	X	X		
HLO14.AOW3.IO5 TRACK adoption: Methods and tools to track variety adoption and turnover at scale	X	X	X	X		
Total AoW 3 budget					4,557,475	

Area of Work 4: Breeding Resources					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO15.AOW4.IO2 Hub & spoke scaling: Interoperable tools and services are scaled to match the varied capacities of partners across the breeding network. High-capacity partners are supported to act as central hubs, providing in breeding network support to less resourced partners.	X	X	X	X	3,156,222
HLO16.AOW4.IO3 Shared services: A portfolio of connected tools and services that collectively meet current and emerging needs for modernized breeding is made available to breeding networks.	X	X	X	X	
HLO17.AOW4.IO3 FAIR principles: All breeding programs are supported to maximize alignment with FAIR principles	X	X	X	X	
Total AoW 4 budget					3,156,222

Area of Work 5: Enable					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO18.AOW5.IO2 Partnered networks: Strategic planning of crop x region breeding networks that enables collaboration on common challenges and opportunities.	X	X	X	X	1,639,977
HLO19.AOW5.IO2 Share capacity: Coordinated capacity-sharing strategies for the breeding networks, enabling a dynamic future workforce with appropriate infrastructure and resources in CGIAR and NARES breeding partners.	X	X	X	X	
HLO20.AOW5.IO3 Assess performance: Evaluation and assessment of performance data gathered by AOWS and any additional data gathering required to address gaps in the MELIA framework	X	X	X	X	
HLO21.AOW5.IO3 Improve management: Learnings and organizational bottlenecks identified in the HLO Assess performance are addressed, enabling maximum impact from (return on) investment	X	X	X	X	
HLO22.AOW5.IO5 Exchange genetic resources: Recommendations and guidance on genetic resources policies and practices relating to the use and exchange of genetic resources	X	X	X	X	
Total AoW 5 budget					1,639,977

CGIAR

BREEDING FOR
TOMORROW

W3 Mapping

Uyole 03, an improved bean variety helping farmers improve their lives and empowering women, is the result of a joint effort by the government funded Uyole Agricultural Research Institute, with Technical backstopping from international research organizations such as the International Tropical Agriculture (IITA) CIAT, ICRISAT, Wageningen University, One Acre Fund and Farm inputs Promotions Services (FIPS) and support from the Tanzanian Government and Bill & Melinda Gates Foundation.

Cross-Program collaboration

Program	Primary/ Secondary collaboration	Area of Work Title and Number	High level output	Brief description of how each Program contributes
Scaling for Impact	B4T: AoW1 - Market Intelligence (INVEST HLO); IFPRI	Achieving Impact by Unlocking Finance and Partnerships AoW4	4.1 CGIAR expertise and solutions embedded in development investments and partnerships	Joint work on designing an advanced market commitment for climate-resilient crop varieties for sub-Saharan Africa
Scaling for Impact	B4T: AoW3 - Inclusive Delivery (POWER HLO); IFPRI	Enabling Environment Lab AoW3	3.3 Science-policy partnership interfaces for responsible scaling	Joint work on improving seed policy and regulation in selected countries
Better Diets and Nutrition	B4T: AoW1 - Market Intelligence (DESIGN HLO); IFPRI	Biofortified and Health-enhancing Staples AoW4	Framework for embedding nutrition into breeding pipelines and processes	Joint work on analyzing and incorporating nutrition traits in product concepts and target product profiles

Program	Primary/ Secondary collaboration	Area of Work Title and Number	High level output	Brief description of how each Program contributes
Better Diets and Nutrition	B4T: AoW3 - Inclusive Delivery (POWER HLO); IFPRI	Biofortified and Health- enhancing Staples AoW4	Policy options and engagement that address constraints to sustainable healthy diets	Joint work on enabling policies and regulations to scale up the delivery of biofortified crops in selected countries
Gender		AoW2, AoW3		
Scaling for Impact		AoW3	HLO 2.1: Multistakeholder networks and scaling hubs to enhance the capacity of partners for scaling pathway diagnosis, co-design, deployment, and assessment	The Bean program will contribute to scaling through 4 activities: 1. Co-support PABRA breeder workshop to respond to genetic gaps in highly demanded varieties required by seed companies . This aligns with B4T 2. Inform key stakeholders by empirical data country-level roadmaps to consolidate pulse grains and value-added food knowledge and innovations systems as scaling mechanisms for resilient and competitive agrifood systems in ESA 3. Facilitate the adoption of innovation bundles that combine improved agronomic practices and climate adaptation strategies in at least 5 PABRA countries, achieving increase in bean production and enhancing soil health metrics among participating farmers 4. Develop a guide and processes for integrating social innovations in STIBs. Build capacity of extension officers to integrate social innovations. Develop a gender action learning plan and work with farmers as couples and scale STIBs. Activity3-4 aligns with BRAINS projects on enhanced access to proven technologies under BRAINS projects

Program	Primary/ Secondary collaboration	Area of Work Title and Number	High level output	Brief description of how each Program contributes
Policy Innovations		AoW1	HLO5.AOW1.IO3 Investment cases	Through the development of robust market intelligence tools and economic analyses, this work enables breeders and decision-makers to anticipate emerging threats—such as pests and diseases—and to quantify their potential impacts on productivity, livelihoods, and food systems. For instance, our research on the economic effects of Cassava Brown Streak Disease (CBSD) in Southeast Asia illustrates how foresight-driven analysis can reveal the substantial economic burden of this disease, thereby justifying and guiding investments in breeding efforts for resistant cassava varieties. By linking anticipated biotic stressors with targeted varietal development, foresight and metrics contribute directly to breeding programs that are better aligned with future market and farmer needs.
Plant health		Accelerated Breeding AoW2	OP 2.3 and OP 2.4	Identifying the resistant genes for diseases and trait augmentation
Gene Bank		Accelerated Breeding AoW2	OP 2.3 and OP 2.4	Pre breeding and Trait discovery
Gender equality and Inclusion		Accelerated Breeding AoW2 and Inclusive Delivery OP 3.2	OP 2.1 and OP 2.2	TPP with women preference and participation in seed production
Scaling for impact		AoW2: Pathways to scale in agrifood systems	HLO 2.2: Co- designed scaling pathways for regional and national agrifood systems through improved stakeholder capacity	Provides support to design and implement delivery pathways for disseminating biofortified potatoes in Peru
Genebanks		AoW 2: Strategic User Engagement	2.2. Enhanced germplasm information for more precise accession targeting	Information on genetic resources (genotypic/ phenotypic); maintenance of breeding lines for international distribution
SP13 Genebank	Primary	AOW02 Strategic User Engagement	HLO8.AOW2.IO2 Discover genetic potential	Contributing to pre-breeding AoW2 HLO

Program	Primary/ Secondary collaboration	Area of Work Title and Number	High level output	Brief description of how each Program contributes
SP09 Scaling for Impact	Primary	AOW02 Pathways to Scale in Agrifood Systems	HLO13.AOW3. IO5 Power seed scaling	Contributing to seed scaling and demand creation for new varieties
SP10 Gender Equality and Inclusion	Primary	AOW02 Accelerating Change Through Evidence	HLO4.AOW1. IO1 Foster motivations	Cross learnings and synergies in the definition of traits linked to behavior and gender
SP11 Capacity Sharing	Primary	AOW03 CapSha South-South and Triangular Cooperation	HLO9.AOW2. IO2 Transform collaboration	Cross-trainings and support toward the empowerment of key partners
SP12 Digital Transformation	Secondary	AOW01 Data Ecosystem	HLO7.AOW2. IO2 Accelerating genetic gain	Databases and biometric pipeline are integrated into larger data infrastructures.
SP02 Sustainable Farming	Secondary	AOW01 Climate Adaptation and Mitigation on Farms	HLO12.AOW3.IO5 Deploy seed	Climate-smart varieties are deployed as part of GxExM schemes to foster farm adaptation
SP02 Sustainable Farming	Secondary	AOW04 Plant Health and Mycotoxin Safe Crops	HLO10.AOW2.IO2 Create products	IPM packages are applied that include the selection of genotypes with good disease and pest responses
Science Program - Policy Innovations	Primary collaboration	Foresight AoW1	Foresight analysis using IMPACT model for chickpea and sorghum to develop future Market segment	The foresight tools (IMPACT) developed by the AoW Foresight under the SP-Policy Innovations will be used to developed the future market segment
Genebank Accelerator	Primary collaboration	AoW2	Screening and gene discovery for DLC	Raw materials for breeding and trait selection

CGIAR

BREEDING FOR
TOMORROW

System Organization and center allocations

Surrounded by hills, Tlaltizapan station hosts a subtropical, humid climate that allows CIMMYT scientists to experiment with maize qualities such as drought and heat tolerance, yield potential and pest resistance.
Credit: CIMMYT / Alfonso Cortés

System Organization: Breeding for Tomorrow

	Implementation timelines (2025)				Pooled funding Budget
	Q1	Q2	Q3	Q4	2025 (Approved Budget)
Total Program					
Area of Work 0: Crosscutting and Management	X	X	X	X	276,389
Total Program budget					276,389

Area of Work 0: Crosscutting and Management	Implementation timelines (2025)				Pooled funding Budget
	Q1	Q2	Q3	Q4	2025 (Approved Budget)
Permanent Director salary			X	X	276,389
Interim Program Manager - salary costs	X	X	X	X	
Interim Program manager incurred Sci Wk travel costs		X			
Total Cross-cutting and Management budget					276,389

Breeding for Tomorrow: AfricaRice

	Implementation timelines (2025)				Pooled funding Budget
Total Program	Q1	Q2	Q3	Q4	2025 (Approved Budget)
Area of Work 0: Crosscutting and Management	X	X	X	X	52,986
Area of Work 1: Market Intelligence		X	X	X	96,745
Area of Work 2: Accelerated Breeding		X	X	X	659,046
Area of Work 3: Inclusive Delivery		X	X	X	96,745
Area of Work 4: Breeding Resources		X	X	X	81,911
Area of Work 5: Enable		X	X	X	80,621
Total Program budget					1,068,053

Area of Work 0: Crosscutting and Management	2025				
	Q1	Q2	Q3	Q4	2025 (Approved Budget)
Accelerated Breeding AoW co-lead contribution to B4T (Africa Rice colleague)	X	X			52,986
Total Cross-cutting and Management budget					52,986

Area of Work 1: Market Intelligence	2025				
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
OP 1.3. DESIGN: Portfolio of product concepts informing co-design (with DEVELOP) and regular revision of Target Product Profiles following a Product Design Standard		X	X	X	96,745
OP 1.5. INVEST: Portfolio of investment cases for individual breeding pipelines, the Breeding for Tomorrow portfolio and other CGIAR Science Programs		X	X	X	
Total AoW 1 budget					96,745

Area of Work 2: Accelerated Breeding					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
OP 2.1. STRATEGIZE: CGIAR–NARES–SME breeding pipelines and pipeline resources are aligned to key market segments		X	X	X	659,046
OP 2.2. PARTNER: CGIAR–NARES–SME breeding networks implement and continually update strong, impact-oriented partnership models		X	X	X	
OP 2.3. DISCOVER: Trait discovery, development, and deployment efforts are focused on essential traits in TPPs for current and future market segments		X	X	X	
OP 2.4. OPTIMIZE: Breeding scheme for population improvement and product evaluation for each key market segment defined and continuously optimized		X	X	X	
OP 2.5. CREATE: Portfolio of candidate products developed with the potential to drive transformative impact across the five Impact Areas		X	X	X	
Total AoW 2 budget					659,046

Area of Work 3: Inclusive Delivery					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
OP 3.1. POSITION: Co-designed, evidence-based strategies to sustainably position quality seed of improved varieties and complementary innovations within inclusive and equitable seed systems		X	X	X	96,745
OP 3.2. DEPLOY: Co-designed, cost-efficient, inclusive, context-specific technologies and strategies to facilitate increased production and delivery of quality seed of improved varieties		X	X	X	
OP 3.3. TRACK: Co-designed, validated, low-cost, and effective methods and tools to assess and share data and analysis on varietal adoption, varietal turnover, seed replacement, quality seed use, and information uptake at scale		X	X	X	
Total AoW 3 budget					96,745

Area of Work 4: Breeding Resources					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
OP 1.1. A portfolio of shared services that meets current and emerging user needs, delivered by an organisational structure prepared for beyond 2030			X	X	81,911
OP 3.1. Hub-and-Spoke partnerships developed, with regional partners effectively working together as supported by scaled services to expand the reach of genetic innovations		X	X	X	
Total AoW 4 budget					81,911

Area of Work 5: Enable					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
OP 5.1. TRANSFORM: Systematized coordination and provision of tools and approaches to improve partnerships, co-ownership, organization, and understanding of roles within and across breeding and delivery activities in Breeding for Tomorrow		X	X	X	80,621
OP 5.2. SHARE: Coordinated capacity-sharing strategies across Breeding for Tomorrow's breeding and delivery activities		X	X	X	
Total AoW 5 budget					80,621

Breeding for Tomorrow: International Center for Tropical Agriculture

	Implementation timelines (2025)				Pooled funding Budget
Total Program	Q1	Q2	Q3	Q4	2025 (Approved Budget)
Area of Work 0: Crosscutting and Management	X	X	X	X	81,075
Area of Work 1: Market Intelligence	X	X	X	X	250,311

Area of Work 1: Market Intelligence	2025				
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO1.AOW1.IO1 Steer to impact: Market intelligence is packaged into decision-support tools to guide investment decisions in breeding and other science programs	X	X	X	X	250,311
HLO2.AOW1.IO1 Target markets: Market intelligence is gathered to evidence demand-led and foresight opportunities for impact	X	X	X	X	
HLO3.AOW1.IO1 Design concepts: New product concepts are designed for demand-led and foresight opportunities, that can be used by breeders to meet the Product Design Standard.	X	X	X	X	
HLO5.AOW1.IO3 Investment cases: Investment case studies are developed to inform investments for maximized impact (change in targeted SDGs)	X	X	X	X	
Total AoW 1 budget					250,311

Area of Work 2: Accelerated Breeding					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO6.AOW2.IO1 Refocus to markets: Feasible breeding pipelines are aligned to market segments and opportunities, as guided by product concepts.	X	X	X	X	2,573,609
HLO7.AOW2.IO2 Accelerating genetic gain: Design of optimized breeding schemes and pipelines that maximize the potential for genetic gain.	X	X	X	X	
HLO8.AOW2.IO2 Discover genetic potential: Discovery and development of foundational genetic resources such as traits, high-value haplotypes and elite lines that can deliver on targeted product profiles	X	X	X	X	
HLO9.AOW2.IO2 Transform collaboration: Partners are embedded in decision-making for optimized breeding schemes	X	X	X	X	
Total AoW 2 budget					2,573,609

Area of Work 3: Inclusive Delivery					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO11.AOW3.IO4 Position for demand: Strategies to position quality seed and increase scaling partner demand for new varieties, encouraging variety replacement and Product Lifecycle Management.	X	X	X	X	694,091
HLO12.AOW3.IO5 Deploy seed: Technologies and strategies to encourage scaling partners to increase production and equitable supply of new varieties.	X	X	X	X	
HLO13.AOW3.IO5 Power seed scaling: Technologies, strategies and regulatory solutions to encourage scaling partners to accelerate delivery of new varieties to smallholders.	X	X	X	X	
HLO14.AOW3.IO5 TRACK adoption: Methods and tools to track variety adoption and turnover at scale	X	X	X	X	
Total AoW 3 budget					694,091

Area of Work 4: Breeding Resources					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO15.AOW4.IO2 Hub & spoke scaling: Interoperable tools and services are scaled to match the varied capacities of partners across the breeding network. High-capacity partners are supported to act as central hubs, providing in breeding network support to less resourced partners.	X	X	X	X	246,606
HLO16.AOW4.IO3 Shared services: A portfolio of connected tools and services that collectively meet current and emerging needs for modernized breeding is made available to breeding networks.	X	X	X	X	
HLO17.AOW4.IO3 FAIR principles: All breeding programs are supported to maximize alignment with FAIR principles	X	X	X	X	
Total AoW 4 budget					246,606

Area of Work 5: Enable		2025			
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO18.AOW5.IO2 Partnered networks: Strategic planning of crop x region breeding networks that enables collaboration on common challenges and opportunities.	X	X	X	X	280,880
HLO21.AOW5.IO3 Improve management: Learnings and organizational bottlenecks identified in the HLO Assess performance are addressed, enabling maximum impact from (return on) investment	X	X	X	X	
HLO22.AOW5.IO5 Exchange genetic resources: Recommendations and guidance on genetic resources policies and practices relating to the use and exchange of genetic resources	X	X	X	X	
Total AoW 5 budget					280,880

HLO7.AOW2.IO2 Accelerating genetic gain: Design of optimized breeding schemes and pipelines that maximize the potential for genetic gain.	X	X	X	X	
HLO8.AOW2.IO2 Discover genetic potential: Discovery and development of foundational genetic resources such as traits, high-value haplotypes and elite lines that can deliver on targeted product profiles	X	X	X	X	
HLO9.AOW2.IO2 Transform collaboration: Partners are embedded in decision-making for optimized breeding schemes	X	X	X	X	
HLO10.AOW2.IO2 Create products: Breeding networks collaborate on the development of targeted products.	X	X	X	X	
Total AoW 2 budget					2,385,416

Area of Work 3: Inclusive Delivery					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO11.AOW3.IO4 Position for demand: Strategies to position quality seed and increase scaling partner demand for new varieties, encouraging variety replacement and Product Lifecycle Management.		X	X	X	593,093
HLO12.AOW3.IO5 Deploy seed: Technologies and strategies to encourage scaling partners to increase production and equitable supply of new varieties.	X	X	X	X	
HLO13.AOW3.IO5 Power seed scaling: Technologies, strategies and regulatory solutions to encourage scaling partners to accelerate delivery of new varieties to smallholders.	X	X	X	X	
HLO14.AOW3.IO5 TRACK adoption: Methods and tools to track variety adoption and turnover at scale			X	X	
Total AoW 3 budget					593,093

Area of Work 4: Breeding Resources					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO15.AOW4.IO2 Hub & spoke scaling: Interoperable tools and services are scaled to match the varied capacities of partners across the breeding network. High-capacity partners are supported to act as central hubs, providing in breeding network support to less resourced partners.			X	X	130,754
HLO16.AOW4.IO3 Shared services: A portfolio of connected tools and services that collectively meet current and emerging needs for modernized breeding is made available to breeding networks.	X		X	X	
Total AoW 4 budget					130,754

Area of Work 5: Enable					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO18.AOW5.IO2 Partnered networks: Strategic planning of crop x region breeding networks that enables collaboration on common challenges and opportunities.	X	X	X	X	199,616
HLO19.AOW5.IO2 Share capacity: Coordinated capacity-sharing strategies for the breeding networks, enabling a dynamic future workforce with appropriate infrastructure and resources in CGIAR and NARES breeding partners.	X	X	X	X	
HLO20.AOW5.IO3 Assess performance: Evaluation and assessment of performance data gathered by AOWS and any additional data gathering required to address gaps in the MELIA framework	X	X	X	X	
HLO21.AOW5.IO3 Improve management: Learnings and organizational bottlenecks identified in the HLO Assess performance are addressed, enabling maximum impact from (return on) investment	X	X	X	X	
HLO22.AOW5.IO5 Exchange genetic resources: Recommendations and guidance on genetic resources policies and practices relating to the use and exchange of genetic resources	X	X	X	X	
Total AoW 5 budget					199,616

Breeding for Tomorrow: International Livestock Research Institute

	Implementation timelines (2025)				Pooled funding Budget
Total Program	Q1	Q2	Q3	Q4	2025 (Approved Budget)
Area of Work 0: Crosscutting and Management	X	X	X	X	70,539
Total Program budget					70,539

Area of Work 0: Crosscutting and Management					2025
	Q1	Q2	Q3	Q4	2025 (Approved Budget)
Interim Program Deputy Director salary contributions to B4T (ILRI colleague)	X	X	X	X	70,539
Total Cross-cutting and Management budget					70,539

Breeding for Tomorrow: International Rice Research Institute

	Implementation timelines (2025)				Pooled funding Budget
Total Program	Q1	Q2	Q3	Q4	2025 (Approved Budget)
Area of Work 0: Crosscutting and Management	X	X	X	X	148,370
Area of Work 1: Market Intelligence	X	X	X	X	671,282
Area of Work 2: Accelerated Breeding	X	X	X	X	2,669,316
Area of Work 3: Inclusive Delivery	X	X	X	X	672,633
Area of Work 4: Breeding Resources	X	X	X	X	1,017,532
Area of Work 5: Enable	X	X	X	X	157,315
Total Program budget					5,336,448

Area of Work 0: Crosscutting and Management					2025
	Q1	Q2	Q3	Q4	2025 (Approved Budget)
Interim Director salary contribution to B4T	X	X			148,370
Market Intelligence AoW lead salary contribution to B4T	X	X	X	X	
Total Cross-cutting and Management budget					148,370

Area of Work 1: Market Intelligence					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO1.AOW1.IO1 Steer to impact: Market intelligence is packaged into decision-support tools to guide investment decisions in breeding and other science programs	X	X	X	X	671,282
HLO2.AOW1.IO1 Target markets: Market intelligence is gathered to evidence demand-led and foresight opportunities for impact	X	X	X	X	
HLO3.AOW1.IO1 Design concepts: New product concepts are designed for demand-led and foresight opportunities, that can be used by breeders to meet the Product Design Standard.	X	X	X	X	
HLO4.AOW1.IO1 Foster motivations: Intelligence gathered on motivations (social, economic, behavioral) for change across the supply chain, consumers and smallholder farmers	X	X	X	X	
HLO5.AOW1.IO3 Investment cases: Investment case studies are developed to inform investments for maximized impact (change in targeted SDGs)	X	X	X	X	
Total AoW 1 budget					671,282

Area of Work 2: Accelerated Breeding					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO6.AOW2.IO1 Refocus to markets: Feasible breeding pipelines are aligned to market segments and opportunities, as guided by product concepts.	X	X	X	X	2,669,316
HLO7.AOW2.IO2 Accelerating genetic gain: Design of optimized breeding schemes and pipelines that maximize the potential for genetic gain.	X	X	X	X	
HLO8.AOW2.IO2 Discover genetic potential: Discovery and development of foundational genetic resources such as traits, high-value haplotypes and elite lines that can deliver on targeted product profiles	X	X	X	X	
HLO9.AOW2.IO2 Transform collaboration: Partners are embedded in decision-making for optimized breeding schemes	X	X	X	X	
HLO10.AOW2.IO2 Create products: Breeding networks collaborate on the development of targeted products.	X	X	X	X	
Total AoW 2 budget					2,669,316

Area of Work 3: Inclusive Delivery					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO11.AOW3.IO4 Position for demand: Strategies to position quality seed and increase scaling partner demand for new varieties, encouraging variety replacement and Product Lifecycle Management.	X	X	X	X	672,633
HLO12.AOW3.IO5 Deploy seed: Technologies and strategies to encourage scaling partners to increase production and equitable supply of new varieties.	X	X	X	X	
HLO13.AOW3.IO5 Power seed scaling: Technologies, strategies and regulatory solutions to encourage scaling partners to accelerate delivery of new varieties to smallholders.	X	X	X	X	
HLO14.AOW3.IO5 TRACK adoption: Methods and tools to track variety adoption and turnover at scale	X	X	X	X	
Total AoW 3 budget					672,633

Area of Work 4: Breeding Resources					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO15.AOW4.IO2 Hub & spoke scaling: Interoperable tools and services are scaled to match the varied capacities of partners across the breeding network. High-capacity partners are supported to act as central hubs, providing in breeding network support to less resourced partners.	X	X	X	X	1,017,532
HLO16.AOW4.IO3 Shared services: A portfolio of connected tools and services that collectively meet current and emerging needs for modernized breeding is made available to breeding networks.	X	X	X	X	
HLO17.AOW4.IO3 FAIR principles: All breeding programs are supported to maximize alignment with FAIR principles	X	X	X	X	
Total AoW 4 budget					1,017,532

Area of Work 5: Enable					2025
High-Level Outputs	Q1	Q2	Q3	Q4	2025 (Approved Budget)
HLO18.AOW5.IO2 Partnered networks: Strategic planning of crop x region breeding networks that enables collaboration on common challenges and opportunities.			X	X	157,315
HLO20.AOW5.IO3 Assess performance: Evaluation and assessment of performance data gathered by AOWS and any additional data gathering required to address gaps in the MELIA framework	X	X	X	X	
HLO21.AOW5.IO3 Improve management: Learnings and organizational bottlenecks identified in the HLO Assess performance are addressed, enabling maximum impact from (return on) investment			X	X	
HLO22.AOW5.IO5 Exchange genetic resources: Recommendations and guidance on genetic resources policies and practices relating to the use and exchange of genetic resources	X	X	X	X	
Total AoW 5 budget					157,315
